an isolating component attachable to said movable component,
for isolating uncontrolled movement and vibration of said flexible cable
carrier from said at least one print head ,

wherein said movable component comprises a plate attached at one end to said
flexible cable carrier.

Sub B3
AT
One.
3. (Once Amended) An apparatus comprising:

at least one print head;
a movable component attachable to a flexible cable carrier, said
flexible cable carrier being coupled to said at least one print head, and
an isolating component attachable to said movable component,
for isolating uncontrolled movement and vibration of said flexible cable
carrier from said at least one print head ,

wherein said isolating component comprises a linear bearing track.

Attached hereto is a marked-up version of the changes made by the current
amendment. The attached pages are captioned "Version with Markings to Show Changes
Made".
